

A fun way to keep your toddlers busy and learning at the same time!

Materials Needed:

Plastic bin with lid

Rice

Alphabet magnetic letters

Magnet wand

Extra container for "found" letters

How to make:

Add rice and magnet letters to the plastic container. Set child up at table or create a space that can get messy as the rice will most likely spill out. This can be a 1-2 child activity depending on how big the container is. Clean up is a breeze, simply dump letters back in the rice and put the lid on.

Encourage children to look for magnet letters and as they find them tell them the name of that letter.
