

Letter Sound Baskets

What you need:

Basket or tray

Objects that all start with the same sound

Laminated alphabet letter cards

This is a very simple way to introduce young children to beginning sounds and objects that correspond with that sound. You can talk about the alphabet letter and the sound it makes and then allow children to explore the basket. Suggestion would be to only put out one letter at a time but put out several baskets around the room so children are seeing the same letter and sound throughout their environment.
