

# Letter Writing Salt Tray

A great activity for children who are at the beginning stage of learning to write, they can practice letter formation by using a paint brush, stick or their finger.

## Materials Needed:

Large tray with edges on all sides (ex. baking tray)

Salt or sugar

Alphabet letters

## How to make:

Allow children to explore the tray by making lines, circles etc. Introduce the letters and encourage them to copy the letter in the sand. Once children practice and become comfortable with letter formation, name cards, shape or number cards can be added for children to use.
