

PS Magnetic Measurement Activity

Preschool measures ATL - 4 SED - 3, 4 LLD - 1, 2, 3, 4 ELD - 1, 2 COG - 3, 5 PD - 4

Setting up this measurement activity is simple!

First, place your painter's tape at a variety of lengths.

Once your lines are placed, measure out your magnetic tiles to ensure you have enough. - Preschoolers can reuse magnetic tiles for each line if they do not have enough for all three or four lines at one time.

Finally, place a small piece of paper at each line's end for your preschooler or you to write the total amount.

As the children begin putting the magna-tiles on the tape, encourage them to use words like, small, medium, large, short, tall, bigger, smaller.

Ask them to count the tiles when they finish.
